

Sink Unit Assemblies

Code	A	B	C	Bowl	Bowl Depth	Drainer
SK43	1500	600	400	500 x 400	300	DD
SK49	1800	650	450	610 x 455	300	DD

Sink Unit Tops

Code	A	B
SK43T	1500	600
SK49T	1800	650

- Unit Tops** One piece 1.5mm Stainless Steel, fabricated with Anti drip recess and formed ribs to aid rigidity and drainage.
- Shelf** One piece 1.2mm Stainless Steel, with 49mm turn downs.
- Bowl** Single deep drawn pressed bowl welded in 300mm deep as standard overall size options as stated.
- Safety** All sink tops and shelves are constructed with a standard 49mm profile and an inset chamfered safety edge.
- Mounting** Legs are manufactured from 1.5mm x 30mm square box section and set as standard to an 850mm working height.
- Feet** Flanged an adjustable in height for on site levelling.

Available Options

- Waste** Chromed 30mm BSP.
- Upstand** Strainer waste available in either 2500 or 300mm constructed from perforated Stainless Steel and ABS.
- Unit Tops** Flat with anti spill form.
- Standing** Castors set of 4, 2 braked.
- Valance** Full skirted, front, front & left, front & right.
- Taps** Pairs 15mm or 22mm Chromium Plated.

Manufacture & Construction Of Sink Assemblies

Sink tops are manufactured from 1.5mm 304 Stainless Steel with a DP180/120 finish.
 Shelves are manufactured from 1.2mm 304 Stainless Steel with a DP180/120 finish.
 Sink bowls are pressed from 1.2mm 304 Stainless Steel.
 Attachment of the bowl to the unit top is by means of a continuous plasma weld, all welds are fully dressed to DP180/120 finish.
 All legs and framework are manufactured from 1.5mm x 30mm box section 304 Stainless Steel.
